

# Control unit

## EasyStart Pro – combination options

Operation of one or more heaters:

### Benefits of combination:

- Increases overall heating performance of the system
- Prevents long air ducting by using two air heaters
- Uses two small heaters in tight spaces

### Heater grouping:

It is also possible to group two identical heaters and control them simultaneously.

Example:

Airtronic M2 Commercial (4 KW)

Airtronic M2 Commercial (4 KW)

= 8 KW heating performance
